

TECHNICAL BULLETIN

Contractor Mix

Contents: 35% *Annual Ryegrass*
 30% *Perennial Ryegrass*
 20% *Kentucky Bluegrass (98/85)*
 15% *Creeping Red Fescue*

Characteristics

- Adapted to a wide range of turf uses
- Quick establishment rates
- Perennial ryegrasses have a high Endophyte resistance
- Excellent traffic tolerance

Seeding Rates

New Seeding: 6lbs. per 1,000 sq. ft.
Low Maintenance Areas: 3 lbs. per 1,000 sq. ft.
Seeding Dates: March-May, August-October
Dormant Seeding: December-March
Germination Times: 7-14 days (as a mix)

Uses

Storm Water Contractor Mix adapts well to a wide of turf applications. It is a good mix for lawns, cemeteries, construction sites and subdivision boulevards where a more low-maintenance “sod-forming” stand is desired.
